30-09-25:

Tuple:

Note:- append is not coost in tuple

Eg:- Convert the tuple to list to update
the value from ~~true~~ to ~~false~~ True
                value

t₁ = [28, 'vijay', True, 'karan']

temp = list (t₁)

  temp   // Converting list to tuple

olp: [88, 'Vijay', True, 'karan']

temp [2] = ~~False~~ True.

temp   // Olp: [28, 'Vijay', True, 'karan']

//convert again to tuple

~~temp~~ = t₁ = tuple (temp)

    t₁   // (28, 'Vijay', True, 'karan')

SET:-

* A set is an unordered, Mutable collection
of Unique elements and it is heterogenous
in nature

* Set () or { }

* It can automatically delete the duplicate

Not:- append () is not work in set it works
    only in list [ ]

Update is not able to used in set ()

Eg:
S1 = {28, 'Vijay', 78.9, True , 78.9}

S1. add (34)
   S1 || {28, 34, 78.9, True, Vijay}

S1. pop () || it will delete random Values
     o/p: True

to remove particular Values remove ()

   S1. remove (34)
     S1. || {28, 78.9, True, 'Vijay'}
